version history AutoCAD has gone through many versions and upgrades during its history. AutoCAD 2004 was the first version of AutoCAD to be available for use as an independent application as well as a DTP application. It introduced "thread-safe" technology that made running multiple instances of AutoCAD concurrently much more feasible. AutoCAD 2008 introduced a major new feature called "AutoCAD Central", which allowed users to access many of their files from a centralized Web-based management system. In AutoCAD 2010 and 2011, feature-wise, it was the first AutoCAD release to be completely compatible with Windows Vista and Windows 7. AutoCAD 2010 introduced full support for the Windows Vista operating system. AutoCAD was the first DTP application to do this. AutoCAD 2011 introduced

automatic publishing and revision tracking, and expanded and refined its cloud-based software as a service (SaaS) features. AutoCAD 2013 introduced a major upgrade to its cloud-based software as a service (SaaS) features. AutoCAD 2013 SaaS will allow users to collaborate online with others on a drawing and to see their changes. AutoCAD 2014 introduced Quick Access, an improved, keyboard-driven user interface to help facilitate common drawing tasks. AutoCAD 2015 introduced the new Ribbon interface, making it easier for users to work efficiently with the software. AutoCAD 2017 introduced the ability to publish a drawing to the cloud, letting users collaborate and see other people's changes via the cloud. AutoCAD 2018 introduced an entirely new graphical user interface, an overhaul of the drawing environment and many new capabilities. AutoCAD 2019 introduced all-new 2D and 3D modeling, as well as an overhaul of the graphical user interface. It was the first major upgrade since AutoCAD 2008 to be a completely 64-bit application. It was also the first major release to be available as a DTP app as well as an independent app. AutoCAD 2020 introduces several new features, including more integrated computer vision, dual-screen support, and drafting from web-based and mobile devices.
