

Gameplay Power Dynamic camera control based on player movement & cut scenes made more cinematic Tactical “Team Tactics” based on real-life behaviour FIFA 20 introduced the “Team Tactics” system with real-life player data used to create individual playing styles and team dynamics of more than 2,000 teams in the previous FIFA title. In Fifa 22 Serial Key, you can directly control the camera direction and position based on the real-life movements of the player and the tactical situation the player is in. Here are a few examples: 1) Compared to FIFA 20, a match power play will take place with the camera following the player’s movement and real-life situation. 2) The camera will use the information from a specific player in a specific position to determine which angle to move to during a tactical situation. Depth perception of player data Complete to unlock a new play style and learn more about your own team’s dynamics FIFA Gameplay Video The new “Depth Perception” view allows you to know much more about your opponent’s play style and team dynamics. 1) Watch detailed cuts of different play styles: - Coverage: Coverage tackles will be on and off in real-time based on the current tactical situation. This allows you to immediately check the effectiveness of an opponent’s coverage. - Team Tactics: More details about their tactics, such as formations, technique and tendencies, will also be available. 2) Get a better feeling for your own team: The “Depth Perception” view will display different characteristics of your team for each player: - Attacking: The heat map of the player will show the direction and relative distance of the scoring opportunities and off-ball movements. - Passing: You can track the running speed and direction of your teammates, as well as the passing impact of your teammates and opponents. - Defensive: With the information from the “Depth Perception” view, you can analyse the situations of your teammates and opponents. - Pace: The elapsed time of all passing sequences is displayed, and the average of every passing sequence is also shown. - Technique: You can check the running speed and direction of your teammates, as well as the technique
